

SUPPLIERS PARTNERSHIP
FOR THE ENVIRONMENT

SP Carbon Neutrality Roundtable Breakout Discussion

September 18, 2023

At your table, discuss the opportunity for additional guidance related to common industry expectations, regulatory requirements, best practices and methodologies related to carbon and energy, including opportunities related to:

- Segmenting guidance to address varying levels of supplier **maturity** – from minimum expectations to leading practices
- Developing targeted communication to supplier **executives** on industry expectations / priorities
- Developing **governance** guidelines, including policies, processes, etc. to support data quality, stakeholder reporting requirements and performance improvement
- Developing additional common industry **terms and definitions** for priority topics

Discussion Questions

1. If you could only address ONE of the above topics, which do you feel would be the first priority? Which would be the lowest priority?
2. Considering your highest priority topic, what are the top 1-3 things you feel would be important to consider in any future efforts in this area?
3. Outside of the above topics – what else should we be considering in developing additional industry guidance? What would be most valuable to you?
